Biological Safety Cabinets • Cleanrooms • Fume Hoods • Decontaminations • Antimicrobial
Viable Air Sampling • ASHRAE Testing • Incubators • Barrier Isolators • Animal Isolators
Waste Stations • Caging Units & More

At **Laboratory Certification Services, Inc. (LCS)** we know that maintaining control of your critical work environment is vital to your organization's success. We have the knowledge and experience necessary to provide the safety and confidence you need to continue achieving your goals. It is our mission to offer the services needed in a convenient, cost-effective manner.

Since 1984, we've built a reputation as an independent facility providing dependable testing, certification services and contamination control. Our results-oriented staff uses the current standards to deliver clean air solutions wherever they are needed.

Factory Authorized Service Center

Our highly trained professionals have years of experience in certification, consulting, contamination control and repairs. We take great pride in staying up-to-date with industry standards and are a manufacturer's preferred service provider.

HEPA Filtered Air Systems

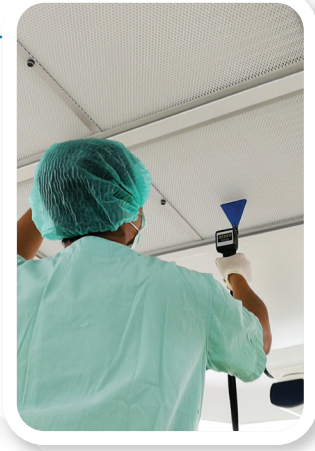

LCS provides testing for all Biological Safety Cabinets, Laminar Flow Devices and custom HEPA Filtered Devices. LCS tests all devices to these current standards:

- ✦ Manufacturer
- ✦ NSF 49
- ✦ USP 797
- ✦ IEST
- ✦ ISO
- ✦ OSHA

Exhaust Devices

We test, certify and service fume hoods and associated systems to the manufacturer's specifications and/ or full or modified ASHRAE 110. Tests include but are not limited to:

- ✦ Face Velocity
- ✦ System Leaks
- ✦ Airflow Patterns
- ✦ Containment

Decontamination

Product or workspace contamination can have crippling results. LCS is proficient in decontaminating everything from your incubators and biological safety cabinets to entire labs.

We now offer Chlorine Dioxide. There are several advantages to using the Chlorine Dioxide decontamination method:

- ✦ Non-Carcinogenic
- ✦ Safest decontamination method among gaseous or vapor decontaminations
- ✦ Short Cycle Times
- ✦ EPA registered for pharmaceutical sterilization
- ✦ Chlorine Dioxide is a true gas (Boiling point 11C)
- ✦ No neutralization of gas is needed
- ✦ Can vent to atmosphere or scrub
- ✦ Gas penetrates dead legs and hard to reach places
- ✦ Used to sanitize equipment in food industry
- ✦ Does not affect stainless steel surfaces
- ✦ No residue

Devices & Services

- Biological Safety Cabinets
- Cleanrooms
- Fume Hoods
- Decontaminations
- Antimicrobial
- Viable Air Sampling
- ASHRAE Testing
- Incubators
- Barrier Isolators
- Animal Isolators
- Waste Stations
- Caging Units & More

Cleanroom

A thorough cleanroom test is essential to maintaining a sterile environment and staying within regulatory compliance. In accordance to ISO 14644, IEST CC006 and USP 797 LCS provides comprehensive cleanroom testing that includes, but not limited to:

- ✦ Non-Viable Particle Counts
- ✦ Viable Air Sampling
- ✦ Room Static Pressurization Readings
- ✦ HEPA Filter Leak Testing
- ✦ Visual Airflow Pattern Testing
- ✦ Supply and/or Exhaust Air Volumes
- ✦ Room Air Changes Per Hour
- ✦ USP 797 Consulting
- ✦ Temperature, Humidity, Light and Sound Testing
- ✦ Computer Generated Reports
